REASONS FOR ALLOWANCE

Allowable Subject Matter

1. Claims 1-35 are allowed.
2. The following is an examiner's statement of reasons for allowance: Van Bezooijen et al (U.S. Pat. 6,233,292, hereinafter '292, cited by Applicant) discloses a method of determining a frequency offset in a wireless communication device, the method comprises steps of: averaging a first frequency error estimates for determining a short-term average value (col. 2, lines 10-16); averaging a second frequency error estimates for determining a long-term average value, the second frequency error estimates comprising: a superset of the first frequency error estimates (col. 2, lines 10-16). The reference '292 fails to disclose that the frequency offset is determined as a function of the short-term average value when the short-term average value exceeds a short-term threshold value; and the frequency offset is determined as a function of the long-term average value when the long-term average value exceeds a long-term threshold value lower than the short-term threshold value as recited in claims 1, 8, 11, 18, 25, 26, 33.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lax (U.S.Pat. 4,921,467) discloses a local oscillator for radio receiver.

Yerbury et al (U.S. Pat. 5,172,075) disclose a self-calibrating temperature-compensated frequency source.
